

What is: Microsoft Intune

Microsoft Intune is a powerful addition to your Office365 toolset and allows for a comprehensive device management systems, within your existing business licenses.

In a nutshell, Intune allows companies to create a dynamic Office365 environment enabling users to work on devices as they choose while keeping data secure.

Achieve efficiencies in the cloud

Leverage the intelligent cloud for insights and baselines for your security policies and configuration settings. Create highly scalable, globally distributed data protection rules from one central platform.

Support your diverse mobile ecosystem

Intune allows you to securely manage IOS, Android, Windows and macOS devices with a single endpoints management solution. Automate the deployment and policy management for these devices, including app delivery and updates.

Protect data with device enrollment

Protect how your companies data is accessible across different devices, whether they are already enrolled or not. Remove access to company data from specific devices remotely, allowing for a substantial breach protection procedure in the event of stolen or lost devices.

LUCIDICA

The IT team for your business

Set granular conditional access rules

Set conditions to access different levels of data within your company. Whether it is only specific types of devices can access folders or employee levels, it is entirely in your control.

Intune gives you a centralised platform where you can manage all the devices that are accessing your companies data, files and emails and gives you control over what happens where.

To find out more about Intune and investigate the prices for adding this to your Microsoft Licenses, reach out on 020 7042 6310 or email us at service@lucidica.com.
